The ballot in SC2 N3437 on FCD 6937 - Coded graphic character set for text communication - Latin Alphabet - ended with 21 votes approving, and 4 votes disapproving. The ballot would thus have passed if it were a FDIS ballot.

2 of the approving votes were accompanied with comments, and the 4 disapproving votes were also accompanied with comments. 2 of the disapproving votes are reported to be turned into approving votes, if the comments are resolved satisfactorily for the voters. Furthermore comments were received from one O member body. The following reflects the disposition of comments from SC2/WG3 on these comments.

1. Canada

CA.A1 Accepted in principle.

CA.A2 Partly accepted. Note 3 will be deleted.

CA.A3 Partly accepted, as for CA.2

CA.B1 Partly accepted. In 5.3 it will be indicated that the 10646 alignment is made for names only. The column for the UCS long IDs have been in the standard from the beginning, as long character names, they are just aligned with 10646 in this edition. Short IDs will not be added, as it is outside of the scope of the revision.

CA.B2 Not accepted. To add more identifiers in this standard would be error prone at this stage. Furthermore these IDs are not approved at this time, and would most likely not be approved before approval of this standard.

CA.C1 Accepted

CA.C2 Accepted

CA.C3 This will be checked against JTC1 writing style.

CA.C4 Accepted

CA.C5 Accepted

CA.D1 Not accepted. It is not worth it to do such changes, considering that this edition only be a consolidated reissue of the standard.

CA.D2 accepted.

CA.E1 Partly accepted. A note will be added. UCS short IDs will not be added.

CA.F1 [6] will be changed to refer to part 10.

CA.F2 accept.

2. Finland

Not accepted, as per SC2 and SC2/WG3 decisions.

3. Germany

Accepted

4. Japan.

J-1 accepted

J-2 accepted

J-3 accepted

J-4 accepted

J-4.1 accepted

J-5. not accepted. The standard is just a consolidation of the current standard, and adding the requested information would be tedious and error prone at this stage.

J-6 accepted.

J-7 Partly accepted. The graphic characters will be adjusted. Vertical lines will not be added.

5. The Netherlands

Accepted in principle. The repertoire term will be taken from 10646, and the rest from 8859.

6. Sweden

The main comment is not accepted, as per SC2 and SC2/WG3 decisions. Sweden may take up the issue to create a new work item in SC2.

The formatting of tables comment is not accepted, as this would less maintainable than what we have now. With the intent of the revision there is no need to further complicate the edition of this standard.

The comment about adding UCS short identifiers is not accepted. This is an error prone process and tedious, and outside the scope for the revision of the standard.

Spelling errors will be corrected.

Table D.1 Lapp (Sami) will be changed to Samv.

The document will be changed to A4/Letter format. The document will not be changed to 2-coloumn format.

7. Czech Republic

06/00 07/10 12/01 will be changed 14/03 14/11 are correct, but better glyphs will be found
SP will not be added in 02/00 as this is a G0 94-character set, and it is not in ISO-IR 6.

12/02 will be changed to acute accent

A.1 06/00 graphical symbol will be changed

A.2 04/01 graphical symbol will be changed

A.2 06/03 and 06/11 are correct glyphs, but better glyphs will be found

With these dispositions the Canadian and the Japanese member bodies notified WG3 that they changed their vote to yes votes.
